Certificate Course on Road Safety Engineering and Audit

The Ministry of Road Transport and Highways (MORTH) has issued guidelines making it mandatory to carry out road safety audit at Design, Construction and Operation stages of all National Highway projects. It is recognised that roads need careful road safety audit so as to build and maintain forgiving roads. However, there is acute shortage of trained and qualified road safety engineers and auditors in the country.

2. In order to bridge the gap, MORTH has been sponsoring certificate course on 'Road Safety Engineering and Audit' organized by Indian Academy of Highway Engineers (IAHE). MORTH has approved four (4) such courses to be organized during current financial year. The course fee for each participant is Rs. 2 lakhs. MORTH will share 50% of course fee i.e. Rs.1.0 lakh for all participants including those from Private Sectors and balance fee, Rs.1.00 lakhs will be paid by the participant/sponsoring organization concerned.

3. This residential course will have 6 weeks duration and will be delivered in three parts each of two weeks duration. In each course, 20 participants will be registered on first-come-first-serve basis. The first course is scheduled to start from 17.06.2019 at IAHE, Noida. A brochure giving details including qualification & experience requirement for participants, course module & contents, evaluation criteria for certification, etc. along with registration form is enclosed herewith for necessary action.

4. The intending participants/organisations are requested to send their nominations along with registration form and requisite amount of fee latest by 31.05.2019.
